

# Module Wrap-Up

1

In this module, you will

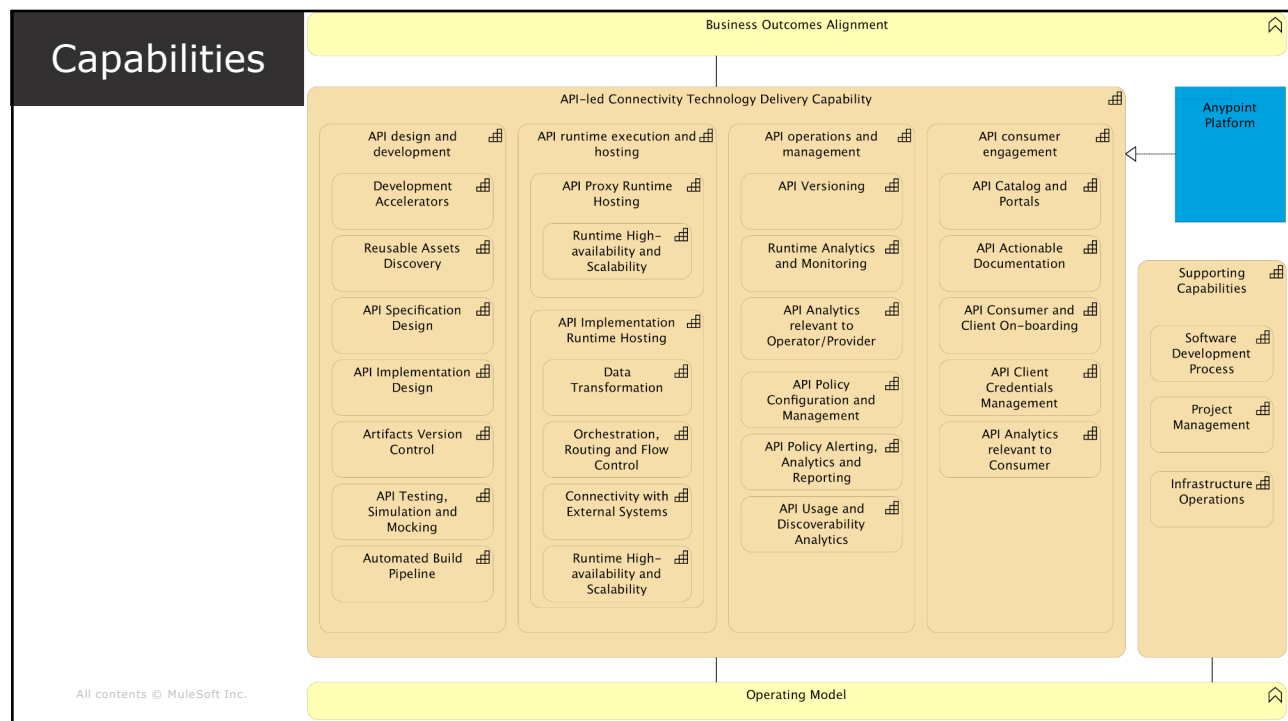

- Review technology delivery **capabilities**
- Review **Catalyst**
- Review course **objectives**
- **Take the class survey**
- Learn **where to go from here**
- Learn how to get **certified!**

2

# Section 1

## Reviewing technology delivery capabilities

3

4

## Section 2

# Reviewing Catalyst

5

| Course content in the context of Catalyst  |                            |                          |                |                | MuleSoft |  |
|--|----------------------------|--------------------------|----------------|----------------|----------|--|
|  | Plan for success           | Establish the foundation | Build to scale | Measure impact |          |  |
| <br>Business outcomes   | Business outcomes playbook |                          |                |                |          |  |
| <br>Technology delivery | Anypoint Platform playbook |                          |                |                |          |  |
|  | Projects playbook          |                          |                |                |          |  |
| <br>Org enablement      | C4E playbook               |                          |                |                |          |  |
|  | Internal support playbook  |                          |                |                |          |  |

6

## Section 3

# Reviewing course objectives

7

### Course goals

- **Direct** the emergence of an effective **application network** out of individual integration solutions following API-led connectivity, working **with all relevant stakeholders** on all levels of the organization
- **Create** credible **high-level architecture models** for integration solutions on Anypoint Platform such that functional and non-functional requirements are likely to be met and the principles of **API-led connectivity** and application networks are followed

## Section 4 Wrap-up

9

Take the class survey

10

## Class survey

- You should have **received an email** with a link to the class survey
  - Your instructor can also provide the **direct link**
    - <http://training.mulesoft.com/survey/{surveyID}.html>
  - Or you can go to a general page and select your class
    - <http://training.mulesoft.com/survey/survey.html>
- **Please fill the survey out now!**
  - **We want your feedback!**
  - **Comments are especially helpful!**

11

# Where to go from here

12

## Take additional MuleSoft training courses

- **Anypoint Platform:**
  - Flow Design
  - API Design
- **Anypoint Platform Development:**
  - Fundamentals
  - Mule 4 for Mule 3 Users
  - DataWeave
- **Anypoint Platform Operations:**
  - CloudHub
  - Runtime Fabric
  - Customer-Hosted Runtimes
  - API Management
- **Anypoint Platform Architecture:**
  - Integration Solutions

13

# Get certified!

14

## MuleSoft Certification program

- Offers multiple types of **professional accreditation** for developers and architects
- **Why get certified?**
  - To confirm you have mastery of the knowledge and skills required to perform your job role and tasks
  - To obtain recognized industry certification
  - To differentiate yourself in the marketplace
- **With each certification, you get**
  - A digital badge for your communications
  - The ability to add the certification to your LinkedIn profile

15

15

## MuleSoft Certified Architect exams

- **MuleSoft Certified Platform Architect - Level 1**

  - Should be able to define and be responsible for an organization's Anypoint Platform strategy
  - The exam validates that an architect has the required knowledge and skills to direct the emergence of an effective application network out of individual integration solutions following API-led connectivity across an organization using Anypoint Platform
- **MuleSoft Certified Integration Architect - Level 1**

  - Should be able to drive and be responsible for an organization's Anypoint Platform implementation and the technical quality, governance (ensuring compliance), and operationalization of the integration solutions
  - The exam validates that an architect has the required knowledge and skills to work with technical and non-technical stakeholders to translate functional and non-functional requirements into integration interfaces and implementations
